## 3 ODFJELL

## 2013 THIRD QUARTER REPORT

## Third Quarter Report 2013

Odfjell SE - Consolidated

## Highlights 3Q 2013

- EBITDA of USD 37 million, reflecting stable earnings both from chemical tankers and tank terminals.
- Time-charter results down $4 \%$ compared with last quarter due to increased voyage expenses.
- Odfjell Terminals (Rotterdam) is working on a revised business plan, scheduled to be completed within year end, and has decided to possibly redevelop most of the older areas of the terminal. Current book value of OTR assets is USD 241 million. As a possible consequence of the revised business plan, impairment of certain OTR assets, including customer relationships and goodwill totalling net USD 54 million, will be evaluated.
- Odfjell signed shipbuilding contracts with Nantong Sinopacific Offshore \& Engineering Co., Ltd for the construction of four LPG/Ethylene gas carriers of 17,000 cbm. The contract includes options for additional vessels.
- Two transactions in the Norwegian bond market were completed, rising in total NOK 500 million.

## Business segments

## Chemical Tankers

Activity over the summer and through the third quarter held steady, and was in line with the second quarter on both contract nominations and spot activity. Contract coverage was $52 \%$ at the end of the third quarter, with the current contract/spot balance allowing flexible trading of our deep-sea fleet. Odfjell's regional trade is gradually improving. No significant technical or operational issues were experienced during the quarter.

The average price of bunker purchased during the quarter was approximately USD 623 per metric ton, basically the same as previous quarter. About USD 3.4 million was collected through bunker adjustment clauses, in addition to USD 1.8 million gained under bunker
hedging contracts, however net bunker cost per tonne increased due to overall less hedge coverage.

Cancellation of some time-charter vessels prior to expiration resulted in compensation to Odfjell of about USD 4.7 million this quarter, included in Gross result.

## LPG/Ethylene

Third quarter the spot market was below expectation, mainly because Asian refiners followed their Middle East counterparts in taking their plants through planned and unplanned shutdowns. This led to a distressed market over the last quarter. In addition, vessels previously tied up on long-term charter contracts were released to the spot market. West of Suez the market was slightly better, with several cargoes moving transatlantic. US exports have also improved.

Total revenues for third quarter came in at USD 2 million, with EBITDA at minus USD 1 million.

## Fleet changes

In September Odfjell signed shipbuilding contracts with Nantong Sinopacific Offshore \& Engineering Co., Ltd for the construction of four LPG/Ethylene carriers of 17,000 cbm. Deliveries are scheduled between October 2015 and May 2016, and the contract price in total is about USD 180 million. We have secured options for delivery of up to four additional gas carriers. This newbuilding order is an important step in our strategy to grow and become a significant operator in the gas market.

In August we entered into two new time-charter contracts, the Golden Top (12,705 dwt) and Southern Koala (21,290 dwt). In November Odfjell, jointly with our 50/50 Chilean joint venture partner CSAV, purchased the Bow Andino (16,121 dwt), which until the purchase was on long-term time-charter contract to Odfjell. Also in November, Odfjell sold Bow Eagle ( $24,700 \mathrm{dwt}$ ), backed by a one-year time-charter with the new owner.

The newbuilding programme for four 46,000 dwt coated chemical tankers at Hyundai Mipo Yard in Korea for delivery between January and July 2014 is on schedule.

## Tank Terminals

Our shareholding in tank terminals business contributed an EBITDA of USD 7 million in third quarter, the same as in previous quarter.

With the exception of OTR, terminal results were largely in line with expectations. Increased throughput in the United States beginning end of second quarter has continued, and has extended into early fourth quarter. Activity in Asia is broadly speaking on budget, but occupancy challenges have emerged in Korea as a result of considerable additional capacity coming on stream in Ulsan the past two years.

OTR's third-quarter EBITDA came in at minus USD 7.9 million, only a slight improvement compared to second quarter's minus USD 8.4 million. The third-quarter EBITDA result included USD 3.0 million in non-recurring items. Capacity approved for use at the end of the third quarter was just over 1 million cbm. Occupancy at the end of September was $85 \%$ of commercially available capacity. All tanks in the new part of the terminal are in operation. Active cost control efforts continue.

New regulatory requirements and the submission of an application by OTR for a renewed environmental permit, have made it prudent to halt temporarily further re-commissioning of old tank capacity at the terminal. In the meantime OTR has initiated an intensive process of developing a revised business plan. This plan, which is scheduled to be completed within year end, will reflect the regulatory environment and address future business opportunities given the strategic location of the terminal.

Current book value of OTR assets is USD 241 million. As a possible consequence of the revised business plan, impairment of certain OTR assets, including customer relationships and goodwill totalling USD 54 million, will be evaluated.

${ }^{1}$ Revenue and profit from the terminals included in the Lindsay Goldberg transaction in 2013 are recognized according to the new ownership percentages from 1 September.

## Finance

In September Odfjell completed two transactions in the Norwegian bond market. NOK 400 million was raised through a tap issue of the existing senior unsecured bonds maturing in December 2015, following which a total of NOK 600 million remains outstanding. Additional NOK 100 million of our own bond holdings (ODF04), maturing in April 2017, were reissued, following which the total amount outstanding is NOK 600 million. Both offerings were oversubscribed. The net proceeds from the transactions will be used for repayment of bonds maturing in December and for general corporate purposes.

Two of the four vessels under construction in Korea have been financed through a long-term sale/lease-back structure, which will be effective at delivery of the vessels. Financing of the two remaining vessels is expected to be concluded soon. Over the next two quarters, financing covering 5-6 existing vessels will mature. We are in the process of refinancing these vessels at terms more favourable than the current financing.

The agreement for the refinancing of the terminal in Rotterdam was signed in the beginning of November. The refinancing of existing debt will generate surplus liquidity, and contains an additional tranche for drawing additional funds against completed capital expenditure projects.

Following the completion of the Lindsay Goldberg transaction, Odfjell has booked a total capital gain of USD 24.5 million. USD 19.5 million of this gain was booked in the third quarter, and USD 5 million was booked in the second quarter. Profit and loss figures from the
terminals included in the transaction are recognized according to the new ownership percentages from 1 September.

## Shareholder information

By end September, Odfjell A and B shares were trading at NOK 40.10 and NOK 39.00 respectively, against NOK 26.80 and NOK 26.00 respectively at the close of the previous quarter. In the same period the Oslo Stock Exchange Benchmark Index gained 7\% and the Transportation Index gained 15\%.

As of 30 September 2013 Odfjell had a market capitalization of about NOK 3,400 million, which is equivalent to about USD 576 million.

## Prospects

The US economy and the US dollar are finally looking up, which is good news for our business generally.

The European economy is still lagging but is showing some modest improvement.
The big question is the strength of China's economy. Excessive credit growth, rising local government debt and weaker export momentum may cap the Chinese recovery, from the last two quarters of slowdown.

Based on the above we expect a slow but steady increase in demand for our services. Ordering of product tankers is picking up, whilst the orderbook within the core chemical segment still remains modest.

We expect the final quarter of 2013 to be similar to or slightly better for our chemical tankers than the third quarter. As to terminals, with the exception of Odfjell Terminals (Rotterdam), we expect continued stable results.

## Notes to the consolidated financial statements

## Note 1 - Accounting principles

Odfjell SE is ultimate parent company of the Odfjell Group. Odfjell SE is a public listed company traded on the Oslo Stock Exchange. The company's address is Conrad Mohrsv. 29, Bergen, Norway.

## Basis of preparation

The interim consolidated financial statements for Odfjell Group have been prepared in accordance with International Accounting Standard IAS 34 "Interim Financial Reporting". The interim financial statements are unaudited.

## Significant accounting principles

The accounting principles used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2012. These consolidated condensed financial statements should be read in conjunction with the 2012 annual financial statements, which include a full description of the Group's accounting principles.

IASB has issued some standards or Interpretation, which are effective from 1 January 2014 or later:
IFRS 9 Financial Instruments
IFRS 10 Consolidated Financial Statements
IFRS 11 Joint Arrangement
IFRS 12 Disclosure of Involvements with Other Entities
IAS 27 Separate Financial Statement (revised)
IAS 28 Investments in Associates and Joint Ventures (revised)
It is expected that changes in IFRS 11 will have material effect in how Odfjell presents it joint arrangement. Net result will not be changed, while total assets will be reduced and equity ratio will increase. Odfjell has presented figures based on equity method in a separate note, see note 9. All other changes are expected to have no or only immaterial effect on the financial statement.

Increase in pension liabilities: USD 31995
Decrease in other equity: USD 33632
Net cost recognised in other comprehensive income: USD 10210

## Note 8 - Fair value and financial instruments

The group classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurement. The measurement used by Odfjell is either level 1 or 2 , where level 1 is quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity an access at the measurement date, and level 2 are inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. For some non-derivative financial assets and liabilities we consider carrying amount to be the best estimate of fair value due to short maturity date and valid terms, i.e. current receivables and payables.

During the third quarter of 2013 there have been no transfers between levels of the fair value hierarchy. The group accounts for transfers between levels of the fair value hierarchy from the date of the event or change in circumstances that caused the transfer.

Assets and liabilities which are measured at fair value in the Consolidated Balance Sheet and their level of the fair value hierarchy were as follows:

|  | 3 Q13 <br> Level 1 | 3 Q13 <br> Level 2 | $\begin{array}{r} \text { 3Q12 } \\ \text { Level } 1 \\ \hline \end{array}$ | 3 Q12 <br> Level 2 |

## Note 9 - Held for sale

Odfjell announced 18 June that the transaction with Lindsay Goldberg to expand the joint venture with Lindsay Goldberg to include substantially all of the Odfjell's tank terminals business globally had been closed. As part of the transaction, Lindsay Goldberg has acquired a 49\% interest in Odfjell Terminals AS ("OTAS"), the holding company for Odfjell's tank terminals activities. In exchange for a $49 \%$ share in OTAS, Lindsay Goldberg made a cash investment in OTAS, by way of a capital increase of USD 219.2 million. OTAS is now owned $51 \%$ by Odfjell and $49 \%$ by Lindsay Goldberg. Odfjell realized a book gain of USD 24.5 million related to the transaction.

Under the equity method the Group's share of net result in associates and joint ventures for the year is included in net result. The Group's interests in joint ventures and associates are carried on the balance sheet at an amount that reflects its share of the net assets of the company. The carrying value of investment in a joint venture or associate will never be negative, unless the Group has incurred or guaranteed obligations in respect of the company. Goodwill is included in the carrying amount of the investment and is not amortized.
